

## *Quality Control and Environment Protection Policy*

Quality control and environment protection in accordance with the international standards ISO 9001:2015 and ISO 14001:2015 are the first and foremost factors in Kris Fashion Industries' production process.

The quality control and environment protection's policy is integral part of the management politics of the company and matches the preset strategic goals. It is achieved by accomplishing goals, which are reviewed periodically and updated if necessary.

In the environment of increased customer expectations and staying competitive, Kris Fashion Industries' management guarantees keeping the following principles about quality control and environment protection:

- Highest quality of the offered products and services
- Comply with terms and conditions of customers
- Handle all refunds and objections in professional matter
- Motivate our associates by improving qualifications, skills, education and provide reasonable payment
- Minimize pollution and negative impact on the environment
- Provide safe and healthy working conditions

The management commits to the following responsibilities for the implementation of these principles:

- Constant improvement of quality standards and meeting customers' expectations by monitoring their feedback and satisfaction levels
- Management participation and dedication in implementing goals about operations as well as involvement of the personnel in achieving these goals.
- Provide all necessary resources for technical improvement, technological advancement and quality control
- Prevent pollution and improve environment protection standards
- Comply with all applicable regulations and other requirements about environment protection
- Force discipline and encourage personal responsibility about quality control and environment protection

- Constantly improve efficiency of ISO standards by systematic evaluation of achieved goals and future prospects
- Create efficient and mutually beneficial relations with suppliers, customers and other parties interested in protecting the environment

Kris Fashion Industries' management is going to oversee and set specific goals, measurable criteria and tasks for future implementation
